Guidelines for filling Form A and description of Codes

1. Use capital letters or write legibly. All items are self-explanatory. Give minimal explanation for a particular item in "Remarks" (*Item 16*), wherever needed.
2. Be to the point for *Item 6*, give only the most salient features, traits or alleles, considered suitable for consideration of registration.
3. On the other hand, give detailed description of traits & characteristics of the material in *Item 14*. Follow the format of variety release application or AIMS-GEP data sheets for respective crops. Use separate sheet if needed.

Give main botanical and morpho-agronomic characteristics in description in case of host plants and morpho economic traits in case of silkworm Include isozyme or DNA profile or other chemical/biochemical characteristics, if available.

4. Use Codes for filling in *Item 1,4,5,7* [actual], *9,10, 11* and *13AB* [Breeding Method]. In case of the code "Other" fill in specific details in *Item 16*.
5. For filling silkworm / host plant name (*Item 2*) give English or Hindi name, if known. In case a local name is given then also specify in parenthesis the language or dialect in which this name is used.
6. Give name(s) of all persons associated with development of the material in *Item 12*. Use separate sheet and fill in additional names along with designation, address and phone/fax/email, etc. beginning with Sr.No. 2 on new sheet, in the same format
7. *Item 13* has two alternate parts, (A) and (B) to fill in:
 - (a) In case Nature of the material to be registered as given in *Item 13* is "Germplasm" then you must give its basic passport information, that should include National Identity (IC/EC) given by CSGRC or other Identity Number allotted and maintained locally. In latter case, CSGRC will provide a unique National Identifier Number (IC), based on passport data provided.
 - (b) In case the nature of the material to be registered is Genetic Stock, then clearly give its Pedigree, including parentage, year of crossing or selection. Also give breeding method used in codes described below.
8. Give particulars of developers in *Item 12* over and that of corresponding person in *Item 13* as the applicant and developer may not be always the same as the first person responsible for development of the material.
9. Undertaking to the effect ensuring long term conservation and maintenance of active material for facilitating access and sustainable use has been given, which may be read and implied before putting signatures.

1. Whether this is a new application or a revised one? (Yes/No)
2. Whether same or similar material has been registered earlier? (Yes/No)
3. Whether unique or distinguishing characteristics of potential value merit consideration for registration? (Yes/No)
4. Whether documentary evidence or data is provided in support of the claim on potential value of germplasm? (Yes/No)
5. State, if possible any other economic potential value of germplasm. (Yes/No)

CSGRC viewpoint about the candidate germplasm.

1. Whether applicant, institution, university, or centre has given a commitment for maintenance and supply of germplasm for use? (Yes/No)
